18 March 1969

**MEMORANDUM FOR THE RECORD**

**SUBJECT:** Trip Report to [ ] and LAC, 13-14 March 1969

LAC has conducted a preliminary analysis of the drag reduction configuration proposed for installation on the U-2 subsequent to successful wind tunnel testing and has concluded that the installation will probably be acceptable from a stress analysis standpoint. Consequently, this configuration is scheduled to be tested in the wind tunnel from 19 - 25 March. If these wind tunnel tests yield significant drag reductions, a flight test hardware installation will be initiated.
